01. INSTITUTIONAL PRESENTATION

LASO TRANSPORTES, S.A. is a company specialized on road transportation services of normal and special loads.

Based on a versatile fleet with around 2600 pieces of equipments, an extensive operational reach, a deep technical know-how acquired over the years and a qualified work force with more than 1300 employees, LASO has become a reference brand in the normal and special transport market in Portugal and internationally.

LASO stands out for its focus on the specific needs of its costumers, both Nationally and Internationally, offering solutions for any challenge that presents itself.

With branches throughout the World, namely Spain, Germany, Holland, Italy, France, Slovenia and recently in the UK, Mozambique and Marrocco, LASO has hundreds of trucks on duty in the international markets.

LASO stands out for its focus on the specific needs of its costumers, both Nationally and Internationlly, offering solutions for any that presents itself.

"At your service, we overcome obstacles"

THIS IS LASO'S ESSENCE

THE COMPANY

Provide a reference service in the area of road freight transport area, recognized national and internationally, for the ability to provide solutions and exceed its customers expectations, respecting the environment and fostering the satisfaction and professional fulfillment of its employees.

Consolidate the position of reference player in the field of road freight transport at national and international levels, increasing its presence and overcoming obstacles anywhere in the world.

“LASO HAS NO GEOGRAPHICAL LIMITS [...]”

[...] so it has been increasing its international presence through partnerships with companies of recognized prestige in the transport and lifting sector, and through the various projects it has carried out in Africa, in countries like Cape Verde, Senegal and Rwanda and Latin America, Nicaragua.”

SECTORS

About 70 million Km travelled and 2 million tons transported every year, are the best testimony of LASO's capacity, offering the same high quality of service in all operational areas.

OUR 02. SERVICES

LASO has a large amount of transport services and solutions:

SPECIAL TRANSPORTS

Through its extensive fleet and its versatile and multiple equipments, LASO guarantees the safe transport of any load regardless of size or weight.

CONVENTIONAL TRANSPORT

LASO performs conventional transports of general cargo in open or closed vehicles. With the capacity and dimension to satisfy any transport needs of any sector, from civil construction, steel products, heavy industry, to the transport of containers or automotive components.

PROJECT ENGINEERING MANAGEMENT

Ready to develop the most complex transport solutions, LASO performs *road surveys*, studies and technical evaluations of the necessary conditions for high accuracy and precision.

Our Services

We also work as a consultant and not just a mere service provider.

If you have complicated or heavy equipment to transport, LASO will be up to the challenge.

HEAVY LIFT

The Heavy Lift service includes the lifting of oversized loads or equipments that cannot be divided.

LASO provides equipments ideal for moving loads of big dimension and weight for different sectors, in Europe and Africa.

Examples of Loads: turbines, generators, compressors, special vehicles, construction equipment and parts of oil platforms.

MULTIMODAL

LASO manages the entire logistical organization with all the necessary means of transport (road, rail, sea or air) for the movement of loads from origin to destination, through a large network of partners.

LOGISTICS

We analyse the best routes of circulation as well as means of transport, making possible the storage and creating mechanisms so that the delivery of the load is done in the shortest period of time.

AUTOMOBILE INDUSTRY

An aerial photograph showing the transport of large wind turbine components. In the foreground, three massive white cylindrical nacelle sections are lined up on a dirt road, supported by metal cradles. Behind them, a blue semi-trailer is being loaded with another large component by a crane. A yellow truck is visible in the background on a paved road. The landscape is arid with dry grass and scattered trees.

OBJECTIVES

To be the best road freight transport and services company;

Continue the policy of resizing in order to modernize the fleet, concerning versatility and quantity;

Grow and consolidate our reference position both National and Internationally.
